

SPECIFICATION FOR UV-VIS SPECTROPHOTOMETER

UV-VIS Spectrophotometer with complete control through PC or stand alone. Compatible Software supplied as standard. Scan rang 190 – 1100 nm 3000 nm per min scan speed, spectral band width of 0.5 to 5 nm or better, wavelength setting 0.5 nm, both absorption and transmission mode . True double beam optics with Czerny – Turner mounting for high energy throughput and high-quality monochromatic light.

One pair of 10mm quartz cuvette and branded computer
