Required Specification for CO2 Incubator

- Capacity: 170L or More
- Temperature: 4°c above ambient to 50 °C.
- CO2 Range: 0.2-20%
- HEPA Filter Inbuilt.
- System should have large Volume water reservoir for humidity.
- System should 4 position perforated shelves.
- System should have High temperature disinfection cycle at 120 Degree within 4 hours.
- Six sided direct heating system ensures stable temperature control
- CO2 Sensor Auto-Zero: IR Sensor
- Membrane Keypad features digital control and large LED Display.
- System will be supplied with CO2 Cylinder and Regulator.
- Warranty 1 years
